GREAT

Rooshad Shroff's new gallery

DESIGN DISTRICT

Located in Mumbai's heritage centre, Horniman Circle, designer **Rooshad Shroff's** new gallery and office has the perfect view of the magnificent Asiatic Library. It is also flanked by two iconic boutiques – Hermès and Louboutin (also designed by Shroff). While Shroff has kept alive the architecture of the past with high ceilings and arched doorways, the pale grey walls and open layout bring a very modern aesthetic. This also allows the flexibility needed to showcase new collaborations. To give the space a more homey vibe, Shroff has brought in his personal art collection, lending a complete experience to the RooshadSHROFF furniture, lighting and other products.

Stay future forward and embrace the new with a little bit of the old to spark creativity

EYE-CATCHING

Considering we've spent only most of last year at home, you're probably already bored of the way your space looks. Here's your chance to experiment with elements that are different from the standard colours and shapes. Now, we're not talking about changing all your furniture, but just bringing in accents like a coffee table or a side table. And that's where the latest collection from **Ochre at Home** comes in with its dose of playfulness. Geometric patterns and vibrant colours never looked better, and make the perfect accompaniment to your seating arrangements.
